

ISYE 3770 - Statistics and Applications

Spring 2023

Catalog Description - Introduction to probability, probability distributions, point estimation, confidence intervals, hypothesis testing, linear regression, and analysis of variance. Cross-listed with CEE 3770.

Prerequisites - MATH 2401 or 2411 or 24X1 or MATH 2605 or equivalent.

Textbook - D.C. Montgomery and G.C. Runger, Applied Statistics and Probability for Engineers, 6th Edition, 2014, John Wiley and Sons.

Objective - Provide an introduction to probability and statistics, emphasizing applications in science and engineering.

Learning Outcomes and their relationships to ISyE Program – (i) Ability to collect, or ganize, summarize, and present data graphically. (ii) Demonstrate ability to use formal mathematical argument with basic probability concepts, including conditional probability distributions. (iii) Understand how to characterize and assess probability in its role in experiments. (iv) Use statistical tests and confidence intervals to assess mathematical uncertainty in statistical decisions. (v) Select proper statistical techniques for statistical decision-making based on the type of data available. (vi) Use statistical software / toolboxes to conduct data analyses and interpret output. (vii) Draw sound statistical conclusions from experiments and observational studies.

Instructors - Dr. Rontani. Office TBA – Lafayette Building on GTL Campus. e-mail: damien.rontani@centralesupelec.fr. When you email me, please start the subject of the email with [ISyE 3770]. Failure to place this in the subject line could cause your email not to be read. Note that, on a regular basis and except for urgent/critical matters, emails will not be answered on the weekends and after 8:00 pm on the weekdays.

Lectures (in person) - Monday, Wednesday: 05:00pm-06:15pm (except Week #1 look up at the specific schedule), Room TBA in the GTL Building. Any unexpected change of schedule will be announced in a timely manner; new time and location will be provided to the students. Due to the highly constrained schedule on the GTL campus, if a class needs to be rescheduled it will be at a time that allows all students to attend. The lecture notes and handouts will be given in digital format only (no printed format) on Canvas prior to every lecture. The shared printer at GTL (or a personal one) can be used if you want to print your own physical copy of the notes.

Attendance and participation - Attendance is mandatory and will be checked at the beginning of the class.

Online Office hours - Tuesday 4:00pm-5:00pm in virtual format (using for example Zoom). Any unexpected change of schedule will be announced in a timely manner to the students. If you cannot attend the online Office hours, do not hesitate to send me your questions by email at damien.rontani@centralesupelec.fr. Note that email will not be answered after 8:00 pm in the weekdays and during the weekend except for urgent/critical matter.

Grading Policy

Homework	10%
Quiz 1 (1.5h)	17.5%
Quiz 2 (1.5h)	17.5%
Final (2.5h)	25%
Practice Projects (x2)	30%

Grading Scale

Your final grade will be assigned as a letter grade according to the following scale:

A	90-100%
B	80-89%
C	70-79%
D	60-69%
F	0-59%

Important Dates (tentative dates)

Quiz 1	TBA
Quiz 2 (Mid-term)	TBA
Final Exam	Final Week of Class (TBA)
Practice Project 1	TBA
Practice Project 2	TBA

Quizzes and Exams

The quizzes will be closed book with possibly authorized 1 or 2 pages sheet notes depending on the quizzes. In some cases, formula sheets will be provided (e.g., statistical tables, formulaes etc.). The use of a laptop, cellphone, or any smart device with Internet/WIFI connectivity is not authorized during quizzes and exams. It is not permitted to student to collaborate or share information during quizzes and exam: these are individual assignments. The use of a calculator will be allowed.

Quizzes and exam grading policy: Any request regarding a quiz or exam must be made within one week of getting the quiz/exam back. There will be no make-up quizzes for any reason. If you have an acceptable reason (for e.g. illness and in particular covid-related with doctor statement of your inability to take the quiz) for missing a quiz, the weight associated to the quiz will be transferred to a different quiz.

Homework

Problems will be assigned approximately once every or two weeks from Wednesday to Wednesday. Student collaboration is authorized and encouraged, but a submitted homework must be worked out and written up on your own. Indicate on your copy whether or not you have collaborated with other students during the preparation of your homework, and if so, then indicate their names.

Homework should be submitted electronically on Canvas as a single pdf file. Please write your name and box all answers. Procedure for turning in late homework: late homework should also be submitted electronically on Canvas. If Canvas happens not to accept a late submission, email me directly to (damien.rontani@centralesupelec.fr). Please start the subject of the email with [ISyE 3770]: Failure to place this in the subject line could cause your email not to be read. I will then open a temporary slot for you to complete your submission. Homework are also solvable using software available to GT students such as Matlab, Python, or R software, so that students can develop additional computer-based skills with the notions taught in class using these software.

Homework grading policy: The homework will be graded on a completion mark basis and element of solution to the Homework will be provided. Group work is authorized and encourage for the homework. If turned in after the deadline, a homework submission loses 50%. Homework turned in three or more days late will not earn credit. The submission time on Canvas will be used to determine whether homework is submitted on time or not. If you experience problem with the submission do not hesitate to contact me. Copying solutions from a Faculty Solution Manual is cheating. An assignment might be due on the final instructional class days and might be based on material covered during the week before the Final Exam.

Practice / numerical projects

the format is that of a medium-size problem on statistics with the use of Matlab / Python, or R software. The practice projects will be distributed one month before the due date. The student will write a report (using a word processing software) to summarize their results including a technical appendix with their code. These projects are individual assignments with no group work allowed, but in case you are blocked, or some aspects are unclear, you can ask me for clarification / additional explanations. As it is a home-based over an extended period, it is possible new notions beyond the content seen in class can be used, if this is the case, all the necessary bibliographic / technical information will be provided and detailed to ensure that students are able to make the project.

Tentative Topical Outline

Topics	Weeks (approx.)
Probability Introduction	1
Random Variables	1
Discrete Distributions	1
Continuous Distributions (including Normal)	1
Descriptive Statistics	1
Sampling Distributions	1
Point Estimation	1
Confidence Intervals	1.5
Hypothesis Testing	1.5
Simple Linear Regression	1.5
Multiple Linear Regression	1.5
Analysis of Variance, Experimental Design	1.5

-Faculty Expectations Agreement - At Georgia Tech we believe that it is important to strive for an atmosphere of mutual respect, acknowledgement, and responsibility between faculty members and the student body. See <http://www.catalog.gatech.edu/rules/22/> for an articulation of some basic expectation that you can have of me and that I have of you. In the end, simple respect for knowledge, hard work, and cordial interactions will help build the inclusive environment we seek. Therefore, I encourage you to remain committed to the ideals of Georgia Tech while in this class.

Academic Integrity

Georgia Tech aims to cultivate a community based on trust, academic integrity, and honor. Students are expected to act according to the highest ethical standards. For information on Georgia Tech's Academic Honor Code, please visit <http://www.catalog.gatech.edu/policies/honor-code/> or <http://www.catalog.gatech.edu/rules/18/>.

Any student suspected of cheating or plagiarizing on a quiz, exam, or assignment will be reported to the Office of Student Integrity, who will investigate the incident and identify the appropriate penalty for violations.

Accommodations for Students with Disabilities

If you are a student with learning needs that require special accommodation, contact the Office of Disability Services at (404)894-2563 or <http://disabilityservices.gatech.edu/>, as soon as possible, to make an appointment to discuss your special needs and to obtain an accommodations letter. Please also e-mail me as soon as possible to set up a time to discuss your learning needs.

Covid 19 – During orientation some information about good practices and social distancing have been issued to you. Please keep in mind these during class to protect yourself and your fellow yellow jackets. Please follow all guidelines and information provided by the GTL administration.

Additional Information

Course Schedule

All courses will be taught in-class. Classes will not be recorded / or shared through Canvas by faculty as is being done on the Atlanta campus. Classes can be eventually live broadcasted for students in isolation and who could not attend the lectures physically. Note that the scheduling of courses and the eventuality of distance learning may arise during this semester, depending on the evolution of the sanitary condition in France.

Action in case of illness

If students are sick, they should remain in their apartments. They should also contact their professors and Dr. Paul Voss (paul.voss@ece.gatech.edu) for student support and academic accommodations.

Based on the new recommendations released by the Georgia Institute of Technology, sick students will need to collect class notes from their colleagues and Canvas. No classes will be recorded and shared through Canvas by faculty.

In case of faculty illness, the faculty will contact Dr. Bertrand Boussert (bb130@gatech.edu) and Mrs Corinne Guyot (corinne.guyot@georgiatech-metz.fr).
